Industry Ready Software Developer

2+1 Months Hands-On Program

Program Highlights

IT industry is a high growth & rewarding field with ample employment opportunities. According to a CNet report, Open Source industry was worth US\$60 Billion back in 2008. We all know Google as the Search Engine, but do you know that Google is also the world's largest and most profitable Open Source IT Company? You know Java is a programming language, but do you know that almost 60% of the Open Source applications are written in Java? Do you know that the most innovative technologies of today like Firefox, Google Chrome, Android, Facebook etc are all Open Source based? Do you know that most Open Source projects worldwide are developed in a distributed fashion by team members who have never seen / met each other ever in person? How?

Come join the **Industry Ready Software Developer (IRSD)** program which will transform you from a mere Technical graduate into a world class Software Developer which Industry demands today! **Industry Ready Software Developer** is an intensive training program which imparts all that it takes to become a successful Software Professional. The curriculum designed by Industry veterans and endorsed by many IT companies imparts the training modules covering Software Engineering theories; tools required to perform Software Development in dynamic environment, Programming concepts, behavioral and team collaboration concepts, project based learning and open source tools which come handy for a skilled developer. The hands-on pedagogy ensures the additional skills required in new age Software Engineering practices like Agile and Iterative development in globally distributed teams.

Curriculum

2 + 1 months program covering the modules (1 month optional on Advanced Programming on additional fee) :

<ul style="list-style-type: none"> • Software Development Processes (Agile, Traditional, Iterative, Support projects) 	<ul style="list-style-type: none"> • Understanding APIs / Libraries / Packages • 1 Month Advanced Open Source Programming add-on (optional)
